

## RECOMMENDATIONS FOR CLEANING COMFORT POUCHES & COT COVERS

For spray and wipe clean up on the fluid resistant nylon side, any household spray cleaner works. (Mr. Clean, Clorox, 409, etc..) Hard commercial cleaners could eventually break down the material after time, so those are not recommended.

Our pouches can be dry cleaned, and they can also be washed in a large washer and dryer.

We recommend a gentle, cold water cycle for washing, and tumble dry with no heat. A clothes steamer works well for getting out unwanted wrinkles.

If you happen to have one of our Cot Covers that reverses to stars and stripes, we have found that Dawn dish soap works great for taking off grease that may have gotten on the cover from the wheels of the stretcher.
